#### BOARD OF ZONING ADJUSTMENT

# 3421 WISCONSIN AVE. NW Washington, DC 20016

The original brick corner row house at 3421 Wisconsin Avenue NW was built in 1925 and it is currently occupied as five multifamily units. The original single family home has changed significantly over the century with a sleeping porch addition at the rear to accommodate more bedrooms. The original addition is a wood framed mass with a flat roof over a brick base with simpler trim details. The multifamily units are arranged with two units with separate entries on the cellar level, two units on the ground floor with separate entry porches, and one unit on the second floor. The existing third floor is a low attic space with a large skylight visible from the street level. The existing tiled mansard roof wraps the West and North sides of the existing building mass and comes to a peak at the rear where there is a low eave space on the third floor.

The proposed work will expand upon the side massing adjacent to Norton PI. NW, rebuild and improve the existing rear addition, and continue the mansard roof over a portion of the new rear addition. The work also includes raising the ceiling height of the third floor, so that it becomes a lighter usable space. This will be accomplished by extending the existing mansard roof lines to the top of where the existing skylight is now, and by creating taller shed dormers with windows that match the existing second floor window size. The building will still have five multifamily units with one on the cellar level, two on the first floor, one on the second floor, and one on the expanded third floor. The mansard roof will also wrap all three sides of the building so that there is visual consistency on each side. Every proposed architectural move draws from the existing building elements and extends lines from original house.

Special Exception relief per X §901.1 and F §5201.1 is sought for Lot Occupancy and Open Court width (see sheet BZA-04). Existing lot occupancy will increase with the proposed addition from 54% to 69% (up to 70% lot occupancy meeting Special Exception criteria is allowed per F §5201.1). Expansion of the existing enclosed sleeping porch will create a non-conforming two-story dogleg open court at the rear of the property facing into the property's rear yard and the rear yard of the adjacent property. Both non-conforming conditions will be in harmony with the general purpose and intent of the Zoning Regulations and Zoning Maps, and neither will adversely affect the use of the neighboring property.
